About the Role

Australian Lifting Centre Pty Ltd is seeking a driven and highly organized Project Coordinator to join our team. This is a hybrid role requiring strong project management skills, day-to-day task coordination, and people management, especially across teams involved in manufacturing, lifting equipment, or construction environments.

The ideal candidate will also bring hands-on experience or solid understanding of CAD/CAM, technical drafting, or similar engineering workflows to help bridge the gap between technical design and project execution.

Key Responsibilities

Project Coordinator

Key Responsibilities

- Manage and coordinate end-to-end project delivery, including timelines, resources, and client communications
- Assign daily tasks and priorities to workshop and site teams
- Oversee and manage team productivity and performance, fostering accountability and collaboration
- Liaise between design/drafting teams and operations to ensure clear understanding of technical drawings and deliverables
- Track project milestones, risks, and variations using project management software
- Prepare and maintain documentation including work schedules, risk assessments, compliance reports, and progress updates
- Support procurement and inventory planning for ongoing projects
- Ensure all operations meet safety, compliance, and quality standards, particularly in lifting or construction-related work
- Review technical drawings and provide feedback or clarification where needed
- Contribute to process improvement and efficiency initiatives across teams

Skills & Qualifications

- Proven experience in project management, operations coordination, or team leadership
- Relevant degree in Engineering or Project Management
- Background or strong working knowledge in CAD/CAM, AutoCAD or similar drafting software

- Background or strong working knowledge in CAD/CAM, AutoCAD or similar drafting software
- Experience in manufacturing, lifting gear, mechanical workshop, or construction environments is highly regarded
- Excellent communication and interpersonal skills
- Ability to manage multiple tasks under pressure and keep stakeholders aligned
- Strong organizational and time management abilities
- Proficiency in MS Office and project tracking tools

Desirable Attributes

•Knowledge of lifting and rigging product used at construction site.

•Familiar with WHS and Australian safety standards.
•Strong analytical mindset with the ability to translate problems into well-engineered solutions.

What We Offer

- The opportunity to shape the development of advanced mechanical solutions in a specialist equipment environment.
- Strong involvement in end-to-end projects from early design through to validation and implementation.
- A supportive and technically focused environment where innovation and are valued.
- Competitive salary and long-term career prospects within a growing organisation.
